NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) CONSTRUCTION SITE EROSION AND SEDIMENT CONTROL

Introduction: The Town of Golden Beach participates, as a co-permittee with Miami-Dade County, in the National Pollution Discharge Elimination System (NPDES) program. The program is aimed at improving storm runoff water quality. The Town of Golden Beach must address specified activities and program compliance stated within the Annual Reports and permit conditions. The permit conditions require that the Building Official and the Town of Golden Beach Building & Zoning Department enforce the following activities as part of Construction Site Erosion and Sediment Control:

1. **Submission of Erosion & Sediment Control plan:** Applicants for new construction projects or substantial improvements (i.e., additions, pools, etc.) shall submit as part of the mandatory permit submittal documents an erosion and sediment control plan for the development of the site. The qualifier for the permittee shall attest by his notarized signature that the erosion and sediment control plan will be maintained for the duration of the permitted construction activities (see below).
2. **Best Management Practices (BMPs) for Erosion and Sediment Control:** Three (3) mandatory erosion and sediment control best management practices shall be implemented at each development site. These are:
 - a. **Temporary Gravel Construction Entrance & Exit** (See attachment 4.2 and Plate 4.3a, 4.3b).
 - b. **Construction Entrance with Wash Rack** (See attachment 4.3c)
 - c. **Storm Drain Inlet Protection** (See attachment 4.5 and Plates 4.5a,e,g,h,l & j)

Note: The preceding two elements of the plan must be implemented at the development site, inspected and approved by the Building Official or designated inspector prior to the acceptance of the first mandatory Florida Building Code inspection request.
3. **Compliance with Erosion and Sediment Control Plan:** Mandatory Florida Building Code inspections and inspections for erosion and sediment control shall be performed simultaneously with construction inspections. Failure to maintain erosion and sediment control measures during the entire construction phase will result in rejected inspection request and/or Code Enforcement action to be treated as a violation of the Town's Code of Ordinances by the Code Enforcement Officer.

I hereby agree to maintain the attached erosion and sediment control plan for the duration of the construction phase, at the property location: _____, Golden Beach, Fl. 33160
