

**TOWN OF GOLDEN BEACH  
COMMUNITY DEVELOPMENT  
MEMORANDUM**

---

**To:** Building Regulatory Advisory Board  
Town of Golden Beach

**From:** Michael J. Miller, AICP   
Consultant Town Planner

**Date:** August 20<sup>th</sup>, 2021

**Subject:** Zoning Variance Application  
Elevation of Lowest Habitable Floor  
125 Ocean Boulevard  
Lot 6 & South ½ of Lot 7 in Block A  
MMPA Project No.04-0101-0528

---

**ISSUE**

The landowners / applicant, Daniel & Lorena Rodriguez, represented by architect Stephanie De Halfen at SDH Studio, has filed applications with the Town for approval of a new single-family home on a full-sized oceanfront lot (75-foot width). The applications include (1) a BRAB Site Development Plan as well as (2) a request for one variance from the Town Code in order to construct a proposed new single-family residence.

Following is the applicant's current variance request:

- Variance from Section 66-69.1(d)(1)(c) to allow the lowest habitable floor to be constructed at an elevation of 23.6' NGVD vs. 20.2' NGVD which is the maximum permitted by Code.

**ANALYSIS**

As per the Town's request MMPA has completed our review of the above referenced variance application and provide the following comments for consideration:

***Variance from Section 66-69.1(d)(1)(c) to allow the lowest habitable floor (not grade level) to be at an elevation of 23.6' NGVD vs. 20.2' NGVD which is the maximum permitted by Code.***

The applicant is requesting a variance to raise the lowest habitable floor slab elevation to a height of 23.6' NGVD versus the 20.2' height limit set forth in the Code (max. 2.0' above the lowest structural member @ 18.2' NGVD east of the CCCL). The applicant argues that due to the low elevation of the adjoining street (Ocean Blvd.) there is inadequate height for the ground level uses.

125 Ocean Blvd. – Variance Request  
Elevation of Lowest Habitable Floor  
August 20<sup>th</sup>, 2021  
Page 2**

The Town's adjoining street elevation zoning criteria only relates to the allowable height of a freestanding garage / guest quarters placed in the Zone One front yard 60' main house setback area. The correct Code section is cited for the main house, but the real hardship is the existing / proposed land elevations, the FDEP oceanfront building height & structural requirements, and the Town's height measurement criteria. Other oceanfront landowners with similar land elevation situations have focused on that as justification which is valid. The Town / MMPA has requested the applicant to revise their variance application justification text to include a discussion about the existing undulating / high lot grades, the FDEP and Town 18.2' / 20.2' limits and the limited useability of the grade level spaces due to the limited height span.

In this instance where the house will be located the existing / proposed land elevations range around 12.0' – 13.0' NGVD. The existing home to be demolished has a FFE at 13.0 NGVD according to the survey. The proposed new grade level floor (garage / other allowed uses) is proposed at 12.0' NGVD. Since FDEP requires the lowest structural beam to be at least 18.2' NGVD and the Town allows a maximum of 2' above that for the lowest habitable floor (20.2' NGVD) this would leave only about 6.0' of useable height for the ground floor areas. Typically, at least 8' is necessary for a garage / storage use and about 9' of useable height is desired for a functional floor. The applicant is requesting a variance to increase the lowest habitable floor elevation from 20.2' NGVD to 23.6' NGVD which would provide about 9.5' of height for the ground / grade level home areas. Several other oceanfront owners have requested / been granted similar variances (a range of hgt. increases have been approved) due to the undulating oceanfront dune elevations. In the past the Town's administration has supported raising the first habitable floor elevation slightly, to provide for an adequate inside dimension for use (8'+/-). This would equal 20.0' NGVD to the lowest structural member instead of 18.2' (12.0' + 8.0') and 22.0' (20.0' + 2.0') to the lowest habitable floor. The applicant is requesting the additional height so as to not alter the garage / other grade level areas. The applicant has committed that if the variance is granted, the overall height of the house would not exceed the normal height limit (27.5' above 20.2' NGVD) – as shown the maximum height of the main house is 27.4' above 20.2' NGVD. While MMPA understands the reason for the request, we feel this site is no different or unique than other oceanfront sites that have built following the current standards or requested elevation increases to somewhat less heights at about 21.5' – 22.0' NGVD to the 1<sup>st</sup> habitable floor elevation.

**NON-USE VARIANCE JUSTIFICATION**

- 1) *The variance requested is for relief from the provisions of the Town Code.*

The applicant seeks relief from Section 66-69.1(d)(1)(c) of the Town's Code of Ordinances.

**MMPA Comment –** The Code sections stated are correct.

- 2) *In order to recommend the granting of the variance, it must meet all of the following criteria (please provide a response to each item):*
  - a. *The Variance is in fact a Variance from a zoning regulation as set forth within the Zoning Chapter of the Zoning Code.*

**Applicants Response:** Yes – Request is to allow the first habitable floor to start at 23.6' NGVD instead of 20.2' NGVD as stated in the Code.

**MMPA Comment –** Yes, we agree.

- b. *Special conditions and circumstances exist which are peculiar to the land or structure involved, and which are not applicable to other lands or structures in the same district.*

**Applicants Response:** Yes – the existing elevation of the street results in a very low height for the ground floor of the residence, making the space not adequate. A variance is requested to increase height at ground level, without increasing overall permitted height of the residence, in order to provide the space with more height.

**MMPA Comment –** As stated above, the adjoining street elevations have nothing to do with the height measurement of the main house – that applies only if there is a freestanding garage / guest quarters in the Zone One 60' front yard setback area. The real hardship is the existing / proposed land elevations, the FDEP oceanfront building height & structural requirements, and the Town's height measurement criteria. Other oceanfront landowners with similar land elevation situations have used that justification which is valid. The Town / MMPA has requested the applicant to revise their variance application justification text to include a discussion about the existing undulating / high lot grades, the FDEP and Town 18.2' / 20.2' height limits and the limited useability of the grade level spaces due to the limited height span. The lot grades east of the CCCL cannot be easily removed or excavated from the property due to FDEP limitations. The existing lot grades where the house footprint will be range from 12.0' NGVD to 13.0' NGVD, which renders the space below the living areas pretty much unusable for storage / parking / etc. Per conversations with FDEP, they would allow for limited excavation of portions of the existing dune if the excavated material is to remain in the immediate area from which it was removed. However, the applicant does not propose any excavation – they desire to build the grade level floor at 12.0' NGVD and request that the 1<sup>st</sup> habitable floor beams / finished floor be increased several feet to 23.6' NGVD. If the Town allows the internal grade level garage height of 8.0' from finished floor to the lowest structural member (20.0'), which is more than adequate for a garage, the 1<sup>st</sup> habitable floor could be 22.0' vs. 23.6'. The applicant is requesting additional height for 9.5'+/- height.

- c. *The special conditions and circumstances do not result from the actions of the applicant.*

**Applicants Response:** Yes.

**MMPA Comment –** We agree the conditions and circumstance are not a result of actions of the applicant. The existing land elevations, FDEP restrictions, and Town Code limitations create the site conditions the designers must deal with. The oceanfront land elevations undulate from north to south and from Ocean

Blvd. to the Atlantic Ocean. No two lots are exactly the same. In this instance, where the house will be located, the existing / proposed land elevations range around 12.0' – 13.0' NGVD. The proposed new grade level floor is proposed at 12.0' NGVD. Since FDEP requires the lowest structural beam to be at least 18.2' NGVD and the Town allows a maximum of 2' above that for the lowest habitable floor (20.2' NGVD) this would leave only about 6.0' of useable height for the ground floor areas. Typically, at least 8' is necessary for a garage / storage use and about 9'-10' of useable height is desired for a functional floor. The applicant is requesting a variance to increase the lowest habitable floor elevation from 20.2' NGVD to 23.6' NGVD which would provide about 9.5' of height for the ground / grade level home areas.

- d. Granting the variance requested will not confer on the applicant any special privilege that is denied by the Zoning Chapter of the Town Code to other lands or structures in the same district.*

**Applicants Response: No.**

**MMPA Comment** – Due to the unique undulating land elevations of the oceanfront lots several other oceanfront owners have requested / been granted similar variances (a range of hgt. increases have been approved) due to the undulating oceanfront dune elevations. In the past the Town's administration has supported raising the first habitable floor elevation slightly, to provide for an adequate inside dimension for use (8'+/-). This would equal 20.0' NGVD to the lowest structural member instead of 18.2' (12.0' + 8.0') and 22.0' (20.0' + 2.0') to the lowest habitable floor. The applicant is requesting the additional height so as to not alter the garage / other grade level areas. The applicant has committed that if the variance is granted, the overall height of the house would not exceed the normal height limit.

- 3) *Literal interpretations of the provisions of the Zoning Chapter of the Town Code would deprive the applicant of rights commonly enjoyed by other properties in the same district under the terms of zoning regulations and would work unnecessary and undue hardship on the applicant.*

**Applicants Response: Yes.**

**MMPA Comment** – MMPA believes there is some truth to the applicant's response. Due to the unique undulating land elevations of the oceanfront lots several other oceanfront owners have requested / been granted similar variances (a range of hgt. increases have been approved) due to the undulating oceanfront dune elevations. Without this variance the useability of the ground level spaces would be restricted with excavation. If the ground floor areas were used for "habitable" purposes the overall building height would be measured from the floor of that area – not the FDEP height.

- 4) *The variance granted is the minimum variance that will make possible the reasonable use of the land or structure.*

**Applicants Response: Yes.**

**MMPA Comment** – MMPA disagrees with the applicant's claim that the variance requested (a 3.3' height increase from 20.2' to 23.6') is the minimum variance necessary for a reasonable use of the land or structure. Several other oceanfront owners have requested / been granted variances (a range of hgt. increases have been approved) but not many at the requested elevation. Based on our analysis with an 8' ground floor height an increase of 2' would suffice from 20.0' to 22.0'.

- 5) *The granting of the variance will be in harmony with the general intent and purpose of the Town Code and the variance will not be injurious to the area involved or otherwise detrimental to the public welfare.*

**Applicants Response: Yes.**

**MMPA Comment** – MMPA agrees with the applicant's claim that the variance requested would be in harmony with the general intent and purpose of the Code, and there would not be "injury" to the surrounding area or general welfare. Several other oceanfront owners have requested / been granted similar variances (a range of hgt. increases have been approved) but not many at the requested elevation. At a lower elevation reasonable use of the ground floor can occur.

**SUMMARY**

MMPA was requested to review and comment on the requested variances. MMPA has attempted to analyze each request and provide the Town with analysis / design comments.

While MMPA understands the request, we feel the height increase is too aggressive as to a 23.6' 1<sup>st</sup> habitable floor height and 9.6'+/- inside height dimension in the garage / other ground level uses, as others in similar situation have been seeking around 21.5' NGVD and providing an 8.0' – 9.0' inside dimensions. If the Town approves the variance the overall allowable building height should be maintained.

# TOWN OF GOLDEN BEACH Notice of Public Hearing

The **Town Council** of the Town of Golden Beach will hold a Public hearing on the following proposal:

- (1)     Variance Request(s)
- X     New Residential Structure

Construction of a new home Zone 1 – Ocean Front.

1. Variance request from Town Code 66-69.1 - Zone One; (d) (1) (a) (c): Lowest Habitable Floor Height. Main Residence and Building Height:

(b). Primary residential structures built on lots with a street Frontage of 75 feet or more shall not exceed 27.5 feet in height.

(c) The height measurement for main residences shall be measured from the lowest habitable Living Area which is a maximum of two feet above the FDEP lowest structural member (18.2 feet NGVD). This height measurement shall include all portions of the main residence east of the 60-foot front Setback line or Coastal Construction Control Line (CCCL), whichever is more westerly.

Request is to allow the first habitable floor to start at 23.6' NGVD instead of 20.02' NGVD as stated in the Town's code with a building height not exceed the allowable building height listed in the code of 27.5' NGVD

# TOWN OF GOLDEN BEACH BUILDING REGULATORY ADVISORY BOARD APPLICATION and REVIEW PROCEDURE

125  
CLEAN

Thank you for applying to the Building Advisory Board for approval of your project. Below is a brief guideline on how the application review process works and what can be expected. The attached application form contains additional guidelines and information pertinent to your submittal. Please follow all directions contained within the application prior to submitting your package to our office:

## Submittal

Submit your completed application package to the Town by the required deadlines which are available on the Town's website at [www.goldenbeach.us](http://www.goldenbeach.us).

Upon receipt of your application and within the first week after you submit, the Town's zoning and landscape reviewers will perform their first review. Following their review you will receive reports for an approval or comments requesting additional information and/or needed corrections to your plans and/or your application.

## Reports

Two basic types of reports can be issued under a zoning and landscape review; the first report that may be issued will list code deficiencies, if any, as the zoning and landscape reviewer sees them in relationship to the Town's current Zoning Code, the report for zoning will be entitled "Planning and Zoning Comments". This process will continue each time updated information is received and until all issues have been addressed.

After all deficiencies have been addressed and the zoning and Landscape reviewers do not find any deficiencies then a second report will be issued entitled "Town of Golden Beach – Community Development Memorandum" this report is the clearance memorandum to allow the item to move forward and be placed on the Agenda for possible approval by the Board. You will receive two separate reports one from zoning and one from landscaping.

## Deadlines - Agenda Placement

A positive review prior to the meeting is required in order for your application to be placed on the Agenda. As with all applications sufficient time is needed by the Town's reviewers and staff for processing prior to the item moving forward for placement on the Agenda.

Your application will require a satisfactory review within the seven days prior to the scheduled meeting in order to be placed on the Agenda. If a satisfactory recommendation is not received within the time period specified, then the application will be tabled to the next Building Advisory Board meeting in the next month, pending approval of the application. Building Advisory Board meetings are scheduled for the Second Tuesday of each month pending quorum. All notifications will be sent via email on the progress of your application and the Board's ability to meet.

## Special Note

Simple applications might not receive comment sheets and will move directly to a "Town of Golden Beach – Community Development Memorandum" mentioned in the previous paragraph allowing the item to be placed on the Agenda to be heard by the Board.

TOWN OF GOLDEN BEACH  
BUILDING REGULATION ADVISORY BOARD  
APPLICATION FOR  
PETITION FOR VARIANCE

Date: \_\_\_\_\_

Fee: \_\_\_\_\_

I, David Rodriguez hereby petition the Town of Golden Beach for a variance from the terms of the Town of Golden Beach Code of Ordinances affecting property located at: 125 Ocean Blvd Folio No. 19-1235-003-0040

As specified in the attached "Application for Building Regulation Advisory Board" and related supporting material.

1. The Variance requested is for relief from the provisions of **(list section number(s) of the Town of Golden Beach Code of Ordinances)**: Chapter 66, Sec. 66-69.1 Zone One, (d)(1)(c):  
Lowest Habitable Floor Height

2. In order to recommend the granting of the variance, it must meet all the following criteria (please provide a response to each item):

a. The Variance is in fact a Variance from a zoning regulation as set forth within the Zoning Chapter of the Town Code. Yes- Request to allow the first habitable floor to start at 23.6' NGVD instead of 20.2 NGVD as stated in Town's Code.

b. Special conditions and circumstances exist which are peculiar to the land or structure involved, and which are not applicable to other lands or structures in the same district. Yes. The existing elevation of the street results in a very low height for the ground floor of the residence, making this space not adequate. A variance is requested to increase height at ground level, without increasing overall permitted height of the residence, in order to provide the space with more height.

c. The special conditions and circumstances do not result from the actions of the applicant. Yes

d. Granting the Variance requested will not confer on the applicant any special privilege that is denied by the Zoning Chapter of the Town Code to other lands or structures in the same district. No

TOWN OF GOLDEN BEACH  
BUILDING REGULATION ADVISORY BOARD  
PETITION FOR VARIANCE

3. Literal interpretations of the provisions of the Zoning Chapter of the Town Code would deprive the applicant of rights commonly enjoyed by other properties in the same district under the terms of zoning regulations and would work unnecessary and undue hardship on the applicant. Yes

4. The Variance granted is the minimum Variance that will make possible the reasonable use of the land or structure. Yes

5. The granting of the Variance will be in harmony with the general intent and purpose of the Town Code and the Variance will not be injurious to the area involved or otherwise detrimental to the public welfare. Yes

Does the Variance being requested comply with all the above listed criteria?  
 Yes  No

6. Our code states that submission of a written statement is invited and encouraged. Has the applicant (petitioner) explained the variance to the owners of the nearest adjacent residences and sought their approval in writing? Yes  No   
Please attach any written letters of no objection to this petition.

7. Is this request related to new construction?  Yes  No

8. Is construction in progress? No

9. Is this request as a result of a code violation? No

10. Did this condition exist at the time property was acquired?  Yes  No

11. Is this request sought as a remedy to a case to be heard, or action taken by the Special Magistrate? No

12. Do you have a building permit?  Yes  No

Construction of a new home Zone 1 – Ocean Front.

Stephanie Halfen recused herself from voting on this item  
Michael Miller – Michael Miller Planning summarized his report into the record.  
Stephanie Halfen – Architect – spoke on behalf of the applicant

1 .Variance request from Town Code 66-69.1 - Zone One; (d) (1) (a) (c): Lowest Habitable Floor Height. Main Residence and Building Height:

(b). Primary residential structures built on lots with a street Frontage of 75 feet or more shall not exceed 27.5 feet in height.

(c) The height measurement for main residences shall be measured from the lowest habitable Living Area which is a maximum of two feet above the FDEP lowest structural member (18.2 feet NGVD). This height measurement shall include all portions of the main residence east of the 60-foot front Setback line or Coastal Construction Control Line (CCCL), whichever is more westerly.

Request is to allow the first habitable floor to start at 23.6' NGVD instead of 20.2' NGVD as stated in the Town's code and to increase the overall building height listed in the code of 27.5' NGVD

Chairperson – Hollo, questioned the height of the structure (building envelope), and stated he wanted to reconsider his vote due to the Building height not being outlined. After much discussion, the vote remained the same.

Chairperson – Hollo requested that the height of the structure (building envelope) be outlined in what the request is asking for and what the height of the structure (building envelope) would be without the request:

Height of the structure (building envelope) without the variance:  $20.2' \text{ FFE} + 27.5' = 47.7'$ , with the variance the building envelope height is 50'.10" NGVD (A300), 3'.3" difference (taller) in the height of the structure measured from the First Floor Finished elevation of 23.6'
