

TOWN OF GOLDEN BEACH, FLORIDA

RESOLUTION NO. 2880.23

A RESOLUTION OF THE TOWN COUNCIL OF THE TOWN OF GOLDEN BEACH, FLORIDA, AUTHORIZING THE PURCHASE OF POLES FOR THE TOWN-WIDE SECURITY CAMERA UPGRADE FOR AN AMOUNT NOT TO EXCEED \$120,000.00; FINDING THAT THE PURCHASE IS EXEMPT FROM COMPETITIVE BIDDING PURSUANT TO SECTION 2-275 OF THE TOWN CODE; PROVIDING FOR IMPLEMENTATION; PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the Town desires to purchase specific types of poles for the Town-wide security system upgrade; and

WHEREAS, the cost to the Town to purchase the poles will not exceed a total of \$120,000.00; and

WHEREAS, the Town has engaged various vendors to provide competitive pricing for the purchase of the poles as found in the various proposals attached hereto; and

WHEREAS, pursuant to Section 2-275 of the Town's Code of Ordinances (the "Town Code"), the Town Council finds compliance with the bid procedures set forth in the Town Code of Ordinances is impractical and it is in the best interest of the Town to waive the bid procedure; and

WHEREAS, the Town Council hereby waives requirements of the Town's competitive bidding procedures; and

WHEREAS, in accordance with the Town's purchasing procedures, the Town Council authorizes the Town Manager and Mayor to procure poles from a vendor whose prices are consistent to those indicated in the various attachments to this Resolution for a total amount not to exceed \$120,000.00; and

WHEREAS, the Town Council finds that it is in the best interest of the Town to proceed as indicated in this Resolution.

NOW, THEREFORE, BE IT RESOLVED BY THE TOWN COUNCIL OF THE TOWN OF GOLDEN BEACH, FLORIDA, AS FOLLOWS:

Section 1. Recitals Adopted. That each of the above-stated recitals is hereby adopted and confirmed.

Section 2. Purchase Authorized. The expenditure of funds in an amount not to exceed \$120,000.00 for the purchase of poles hereby authorized and approved.

Section 3. Implementation. That the Mayor and Town Manager are authorized to take any and all action which is necessary to implement this Resolution, and the Mayor is authorized to execute a purchase agreement or proposal in connection with the purchase of poles for the Town-Wide Security Camera Upgrade, subject to the approval of the Town Attorney as to form and legal sufficiency.

Section 4. Effective Date. That this Resolution shall be effective immediately upon adoption.

Sponsored by the Town Administration.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

The Motion to adopt the foregoing Resolution was offered by Councilmember Lusskin, seconded by Vice Mayor Bernstein, and on roll call the following vote ensued:

Mayor Glenn Singer	<u>Aye</u>
Vice Mayor Kenneth Bernstein	<u>Aye</u>
Councilmember Judy Lusskin	<u>Aye</u>
Councilmember Jaime Mendal	<u>Aye</u>
Councilmember Bernard Einstein	<u>Aye</u>

PASSED AND ADOPTED by the Town Council of the Town of Golden Beach,

Florida, this 6th day of June, 2023.

MAYOR GLENN SINGER

ATTEST:

LISSETTE PEREZ
TOWN CLERK

APPROVED AS TO FORM
AND LEGAL SUFFICIENCY:

STEPHEN J. HELFMAN
TOWN ATTORNEY

TOWN OF GOLDEN BEACH

One Golden Beach Drive
Golden Beach, FL 33160

MEMORANDUM

Date: June 06, 2023

To: Honorable Mayor Glenn Singer &
Town Council Members

From: Alexander Diaz, *Alex B*
Town Manager

Subject: **Resolution No. 2880.23 – Approving the purchase of poles for the Town-Wide security camera upgrade**

Item Number:

7

Recommendation:

It is recommended that the Town Council adopt the attached Resolution No. 2880.23 as presented.

Background:

The Town has been working with Hotwire over the past 10 months to design and specify the installation of the Town-Wide Security System. There are several parts to the project that the Town is responsible for that need to happen simultaneously in order to keep the project on track. Most importantly, in terms of lead-times, is the procurement of the poles.

The project requires two (2) types of poles: Type (A) poles will be used for all locations not adjacent to waterways; and Type (B) poles will be used in locations along the Intercoastal and Ocean.

Although the Town is responsible for procuring all poles, Hotwire is only responsible for the installation of Type B poles. The installation of Type B poles, calls for the use of helical pilings to stabilize the pole in the sand and near the seawalls.

Current market conditions estimates 18-24 weeks for the aluminum poles to be manufactured and delivered. During that time, the Town will be working on the infrastructure portion of the project. We must provide power to all locations and water to locations on the ocean, bridges and intracoastal (see attached Exhibit).

The Town has been working with several vendors to find the most competitive solution.

The Town is responsible for purchasing all poles for the seventy-eight (78) locations, and responsible for the installation of interior Town poles.

We are asking the Town Council to authorize a budget for the purchasing of all poles, granting the Town Manager and Mayor authority to make final vendor(s) selection.

As you will find in the supporting documents we are exploring pole options that range between \$900 to \$1,300 for Type A poles, and \$1,800 to \$2,100 for Type B poles.

The Town will order approximately

48 Type A Poles	An amount not to exceed \$60,000.00
30 Type B Poles	An amount not to exceed \$45,000.00
Contingency	An amount not to exceed \$15,000.00

Total = **78 pole locations** A Budgeted amount not to exceed \$120,000.00

Fiscal Impact:

The cost for the purchase of the poles is \$120,000.00. These funds were budgeted in Fund 120-521316 where \$216,000.00 was budgeted for this project.

<p>Total</p>	<p>\$168,900.00</p>

Terms - 50% Deposit with Payment Full Prior to Shipping

Payment: An initial deposit of 50% due prior to start of production with balance due in full upon completion and prior to shipping.

Production time: 6 to 8 weeks from date of PO, if applicable.

The prices quoted are valid for 15 days from the date of quotation.

Orders larger than 150 items require an agreed production schedule.

Notes:

NOTES: Terms will be reviewed upon receipt of order. Wind-induced vibrations, such as vortex shedding and harmonic oscillation/resonance, of structures of all types due to unpredictable interaction with wind and surrounding structures, exposure, and terrain rarely occur. The owner's maintenance program should include observations for vibration and any resulting loosening of connecting hardware or damage to the structure. The Sabre warranty specifically excludes failure due to fatigue or similar phenomena as a result of the aforementioned behavior. The permit package includes a profile drawing of the structure with member sizes; anchor bolt details; descriptive notes; structural calculations; a table of supported antennas, mounts, and feedlines; and a foundation sketch and calculations (if applicable)

Any additional requirements may result in increased foundation size and price. Dimensional information is preliminary only; it may change based on final engineering. All HOP Industries mounts are quoted with support pipes of appropriate length for most applications if not otherwise specified. If different support pipe lengths are required at the time of the order, additional costs may be incurred. Cable type safety climbing device provided does not include harness. Freight charges quoted are for provided materials only. Additional freight charges may be incurred with the order of additional items. All antennas, transmission lines, jumpers, ground kits, hangers, and hardware are to be provided and installed by others. If a customer requests to pick up a tower, a \$300.00 per truck charge may apply for dunnage and loading. Storage charges of \$350.00 per month may apply to start thirty (30) days after originally scheduled ship date. Due to material price fluctuations, HOP Industries Inc reserves the right to review all material pricing prior to accepting any order.

- Pricing includes delivery within the contiguous USA unless otherwise noted and is based on an order release within 30 days.
- Preshipped anchor bolts at CUSTOMER'S expense.
- Sales tax calculation (if applicable) will be finalized at order entry (OE).
- If order quantity & quote quantity are different, pricing is subject to change.
- Quote is subject to Wisconsin Lighting Lab's standard terms and conditions. See website for complete details.

Grand Total: \$38,670.00
**Estimated Lead Time: 12-14
Weeks**
Important Notes

- Light Poles & Brackets: [10] to [12] weeks estimated production lead time.
- Light pole base: fits ***SEE SPEC SHEET***
- Loading Assumption: light poles rated for ***SEE SPEC SHEET***
- Loading Assumption: mounting quantity [0, light fixtures]; [0, brackets]; [2, cameras] per pole.
- Lightning strikes and voltage surges can cause LED fixture damage; additional surge protection available upon request.
- Non-Standard specifications may add to the production lead time.
- Customer responsible for unloading at time of delivery; line items may ship at different times during production cycle.
- Commercial shipping location with receiving dock can be provided to void limited access delivery charges.
- Quoted Lead time is an estimate and is subject to change as business conditions change.

IMPORTANT: Do you require vibration dampeners? We recommend vibration dampeners be used when (1) light poles are being installed on a parking ramp, deck, bridge, pier, airport, train or subway hub/terminal or known problem area (2) a load of 0.75 EPA or smaller is going on the light poles and (3) light poles are being used as camera supports and/or will have non-standard appendages attached to them.

IMPORTANT: Wisconsin Lighting Lab and its vendors are not responsible for the structural adequacy of new and/or existing light pole footing designs and anchor bolts. Estimated loading capacity values and wind zone ratings are based on standard commercial design and engineering criteria, and they do not account for additional loadings from objects such as (but not limited to) signs, banners, cameras, solar panels and flags. Our light pole warranty does not cover vibration induced fatigue failure.

IMPORTANT: Wisconsin Lighting Lab and its vendors consider these quoted products as produced and supplied according to the customer's dimensional, material and/or electrical specifications. To ensure proper selection of the light pole, luminaire, accessories and/or foundation, we recommend the customer consult a qualified local engineer to analyze the loading, design and project criteria for the specific application.
