

Town of Golden Beach
Building & Zoning
New Construction/Addition/Remodel Permit Documentation

Zones

Zone 1- Ocean Front

Zone 2- West of Ocean Blvd & East of Golden Beach

Zone 3-Town Interior Waterfront Properties (Canal/ Intercoastal Waterway)

Separate permits required to be applied with Master Permit.

Date Received

1. Permit application and attachments for gravel entrance (NPDES)
(Permit and passed inspection required prior to permit issuance)
2. Temporary Construction Fence permit displaying its placement on survey
(Zone 1- E. side of Ocean Blvd refer to guideline)
(Permit and passed inspection required prior to permit issuance)
3. Portable toilet permit
(Permit and passed inspection required prior to permit issuance)

MASTER PERMIT application submission, you will need:

- Digital Upload (separate from plans/supporting documentation shared via link):

The Master Permit application, completed with all requested information, folio, legal description, Owner, Architect, Engineer information, etc.

- A. Signed by the owner and contractor, all signatures must be notarized.
- B. Process fee payment 1% of contract value. For payment, submit a PDF copy of check. **The application will not be processed without payment.**
- C. Copy of signed contract between owner and contractor

- The following forms are to be completed and submitted to the Town to be included into the permit file, if applicable.

1. Affidavit of Seawall Conformity (zone 3)
2. Signed Acknowledgement of Retaining Wall requirements (all zones)
3. Affidavit of notification to contractor of survey discrepancies' 600 Block of Golden Beach Drive. (zones 2 & 3)
4. Signed Acknowledgement of Construction Site Cleanliness and Safety
5. Signed Acknowledgement of Sidewalk Curb & Gutter Replacement
6. Requirements for Habitable Structures located Seaward of the Coastal Construction Control Line (zone 1- Ocean front properties)
7. Signed Acknowledgement of Receipt (zone 1) - to be executed & submitted to the Building Department
8. One-Hundred- Year Storm Elevation Requirements for Habitable Structures Located Seaward of a Coastal Construction Control Line
9. Flood Resistant Provisions in the 7th Edition Florida Building
10. Code Flood Damage- Resistant Materials Requirements
11. Non- Conversion Agreement for Enclosures below the base flood elevation or Design Flood Elevation –fully execute and submit to the building department

Town of Golden Beach
Building & Zoning

• **Prior to permit issuance you must obtain approvals from:**

Miami-Dade County, City of North Miami Beach-Water and State of Florida
DEP (if applicable):

Division of Water Resource Management – Coastal Construction Control Line
Permit – Ocean Front Properties - Zone 1 Only

R.E.R. sewer allocation approval letter and stamped plan

R.E.R. landscaping and/or tree removal permit.

R.E.R. grading and drainage approval (stamped plan)

R.E.R. underground water discharge approval (if applicable-stamped plan)

R.E.R. final approval (stamped plan)

Miami-Dade Water and Sewer approval

North Miami Beach approval for water (stamped plan)

Proof of Impact fee payment receipt from Miami-Dade County and
(stamped plan)

After issuance of permit a recorded copy of the Notice of Commencement is
required at first inspection posted in site, a certified copy must be submitted to
the town and attached to the approvals listed above.

ZONE 1 - OCEAN FRONT

ZONE 2- WEST OF OCEAN BLVD EAST OF GOLDEN BEACH

ZONE 3 TOWN INTERIOR WATER FRONT PROPERTIES (CANAL/ INTERCOASTAL WATERWAY)

Town of Golden Beach

Temporary Construction Fence – Zone 1

Guidelines

Construction signage and temporary fencing for Ocean Front properties under construction
- East Side Ocean Boulevard – Zone 1:

- (1) Requires pre-approval of Graphics and Murals, paint color, and permitting of fence and entry gate structures.

Graphics and painted murals on temporary construction fences are permitted for the aesthetic enhancement of the fence and advertisement of the project to be constructed

- (2) Maximum number: one piece of signage per construction site.

- (3) Maximum signage area for fencing abutting Ocean Boulevard:

10 square feet of graphics/murals for frontage of 50 ‘up to <75’

15 square feet of graphics/murals for frontage of 75’ up to <100’

30 square feet of graphics/murals for frontage of 100’ or more

- (4) Maximum sign height: six feet. (Permissible fence height)
- (5) Length of display: permitted for a twelve-month period from day of building permit issuance or until construction is completed, provided active construction is ongoing.
- (6) Construction materials: Framed Plywood affronting Ocean Boulevard
Side and rear yard – Chain link containing a top bar with Green windscreen.

National Pollution Discharge Elimination System (NPDES)

Construction Site Erosion and Sedimentation Control

Introduction: The Town of Golden Beach participates as a co-permittee with Miami-Dade County in the National Pollution Discharge Elimination System (NPDES) program. The program is aimed at improving storm water runoff water quality. The Town of Golden Beach must address specified activities and program compliance stated within the Annual Reports and permit conditions. The permit conditions require the Building Department, Planning & Zoning Department, Public Works Department, and Code Compliance Department to enforce the following activities as part of the Construction Site Erosion and Sedimentation Control (construction activity means the act of developing or improving land that involves the disturbance of soils and includes clearing, grading, and excavation. FDEP has determined that demolition activities also meet the definition of construction activity):

1. **Submission of Erosion & Sedimentation Control plan:** Applicants for new construction projects or substantial improvements (i.e., additions, pools, etc.) shall submit as part of the mandatory permit submittal documents of an erosion and sedimentation control plan for the development of the site. The qualifier for the permittee shall attest by his notarized signature that the erosion and sedimentation control plan will be maintained for the duration of the permitted construction activities (see below).
2. **Best Management Practices (BMPs) for Erosion and Sedimentation Control:** Three (3) mandatory erosion and sedimentation control best management practices shall always be implemented at each development site. These are:
 - a. **Temporary Gravel Construction Entrance & Exit** (See Attachment A).
 - b. **Storm Drain Inlet Protection** (See Attachment B).
 - c. **Staked Turbidity Barrier (Silt Fence)** (See Attachment C).

NOTE: The Preceding three elements of the plan must be implemented at the development site, inspected and approved by the Building Official or designated inspector prior to the acceptance of the first mandatory Florida Building Code inspection request.

3. **Compliance with Erosion and Sedimentation Control Plan:** Mandatory Florida Building Code inspections and inspection for erosion and sedimentation control shall be performed simultaneously with construction inspections. Failure to maintain erosion and sedimentation control measures during the entire construction phase will result in a rejected inspection request and/or Code Compliance Department action to be treated as a violation of the City's Code or Ordinance by the Code Compliance Officer.
4. **Other applicable Environmental Permits:** The Contractor is responsible to obtain any applicable environmental permits which includes and is not limited to the [SFWMD ERP](#), [FDEP CGP](#), or [MDC DERM](#). Contractor is to review the eligibility of their construction activities and obtain all applicable permits as required under each permit condition.

I hereby agree to maintain the attached erosion and sedimentation control plan for the duration of the construction phase.

____ Day of _____ 20____

Attachment A: Stabilized Construction Entrance & Exit

Temporary Gravel Construction Entrance & Exit

Definition:

A stone stabilized pad located at points of vehicular ingress and egress on a construction site.

Purpose:

To stabilize entrances to the construction site and reduce the amount of sediment transported onto public roads by motor vehicles or runoff.

Planning Considerations:

Construction entrances provide an area where mud can be removed from construction vehicle tires before they enter a public road. If the action of the vehicle traveling over the stabilized pad is not sufficient to remove most of the mud, then the tires must be washed before the vehicle enters a public road. If tire washing is provided, provision must be made to intercept the wash water and trap the sediment before it is carried offsite. Construction entrances should be used in conjunction with the stabilization of construction roads to reduce the amount of mud picked up by construction vehicles.

Design Criteria:

Aggregate Size

FDOT No. 1 Coarse Aggregate (1.5 – 3.5 inch stone) (4 – 9 cm) should be used. Wood chips may be used for single family residential construction, provided that they can be prevented from floating away in a storm. Manufactured products also are available to prevent or reduce the amount of sediment tracked onto roadways. If a stabilized exit is not sufficient, street sweeping can be provided as an additional measure.

Entrance Dimensions

If stoned is used, the aggregate layer must be at least 6 inches (15 cm) thick. It must extend the **full width** of the vehicular ingress and egress area. The length of the entrance must be at least 50 feet (20 m). The entrance should widen at its connection to the roadway to accommodate the turning radius of large trucks. (See Figure 1 – Temporary Gravel Construction Entrance)

Construction Specifications

The entrance area should be cleared of all vegetation, roots, and other objectionable material. A geotextile should be laid down to improve stability and simplify maintenance when gravel is used. The gravel shall then be placed over the geotextile to the specified dimensions.

Maintenance:

The stabilized construction exit shall be maintained in a condition that will prevent the tracking or flow of mud onto public rights-of-way. This may require periodic maintenance as conditions demand, and the repair and/or cleanout of any structures used to trap sediments. All materials spilled, dropped, washed, or tracked from vehicles onto roadways or into storm drains must be removed immediately. Sweep the paved road as needed.

Figure 1 – Temporary Gravel Construction Entrance

CHAPTER 4: BEST MANAGEMENT PRACTICES FOR EROSION AND SEDIMENTATION CONTROL

Figure 4.3a. Temporary Gravel Construction Entrance

Source: Erosion Draw

Attachment B: Storm Drain Inlet Protection

Storm Drain Inlet Protection

Definition:

A sediment filter or an excavated impounding area around a storm drain drop inlet or curb inlet.

Purpose:

The purpose of a storm drain inlet is to prevent sediment from entering storm water conveyance systems prior to permanent stabilization of the disturbed area.

Condition Where Practice Applies:

Practice applies where storm drain inlets are to be made operational before permanent stabilization of the disturbed drainage area. Different types of structures are applicable to different conditions (See Figures 2 through 12).

Planning Considerations:

Storm sewers that are made operational before their drainage area is stabilized can convey large amounts of sediment to receiving waters. In the case of extreme sediment loading, the storm sewer itself may clog and lose most of its capacity. To avoid these problems, it is necessary to prevent sediment from entering the system at the inlets.

There are several types of inlets filters and traps, which have different applications depending on the site conditions and type of inlet. Other innovative techniques for accomplishing the same purpose are encouraged, but only after specific plans and details are submitted to and approved by the storm water permitting agency.

Note that these various inlet protection devices are for drainage areas **less than 1 acre (0.4 ha)**. Runoff from large, disturbed areas should be routed through a Temporary Sediment Trap.

Design Criteria:

1. The drainage area shall be no greater than 1 acre (0.4 ha).
2. The inlet protection device shall be constructed to facilitate the cleanout and disposal of trapped sediment and to minimize interference with construction activities.
3. The inlet protection device shall be constructed so that any resultant ponding or storm water will not cause excessive inconvenience or damage to adjacent areas or structures.
4. Figures 2 through 12 provide specific design criteria for each particular inlet protection device.

CHAPTER 4: BEST MANAGEMENT PRACTICES FOR EROSION AND SEDIMENTATION CONTROL

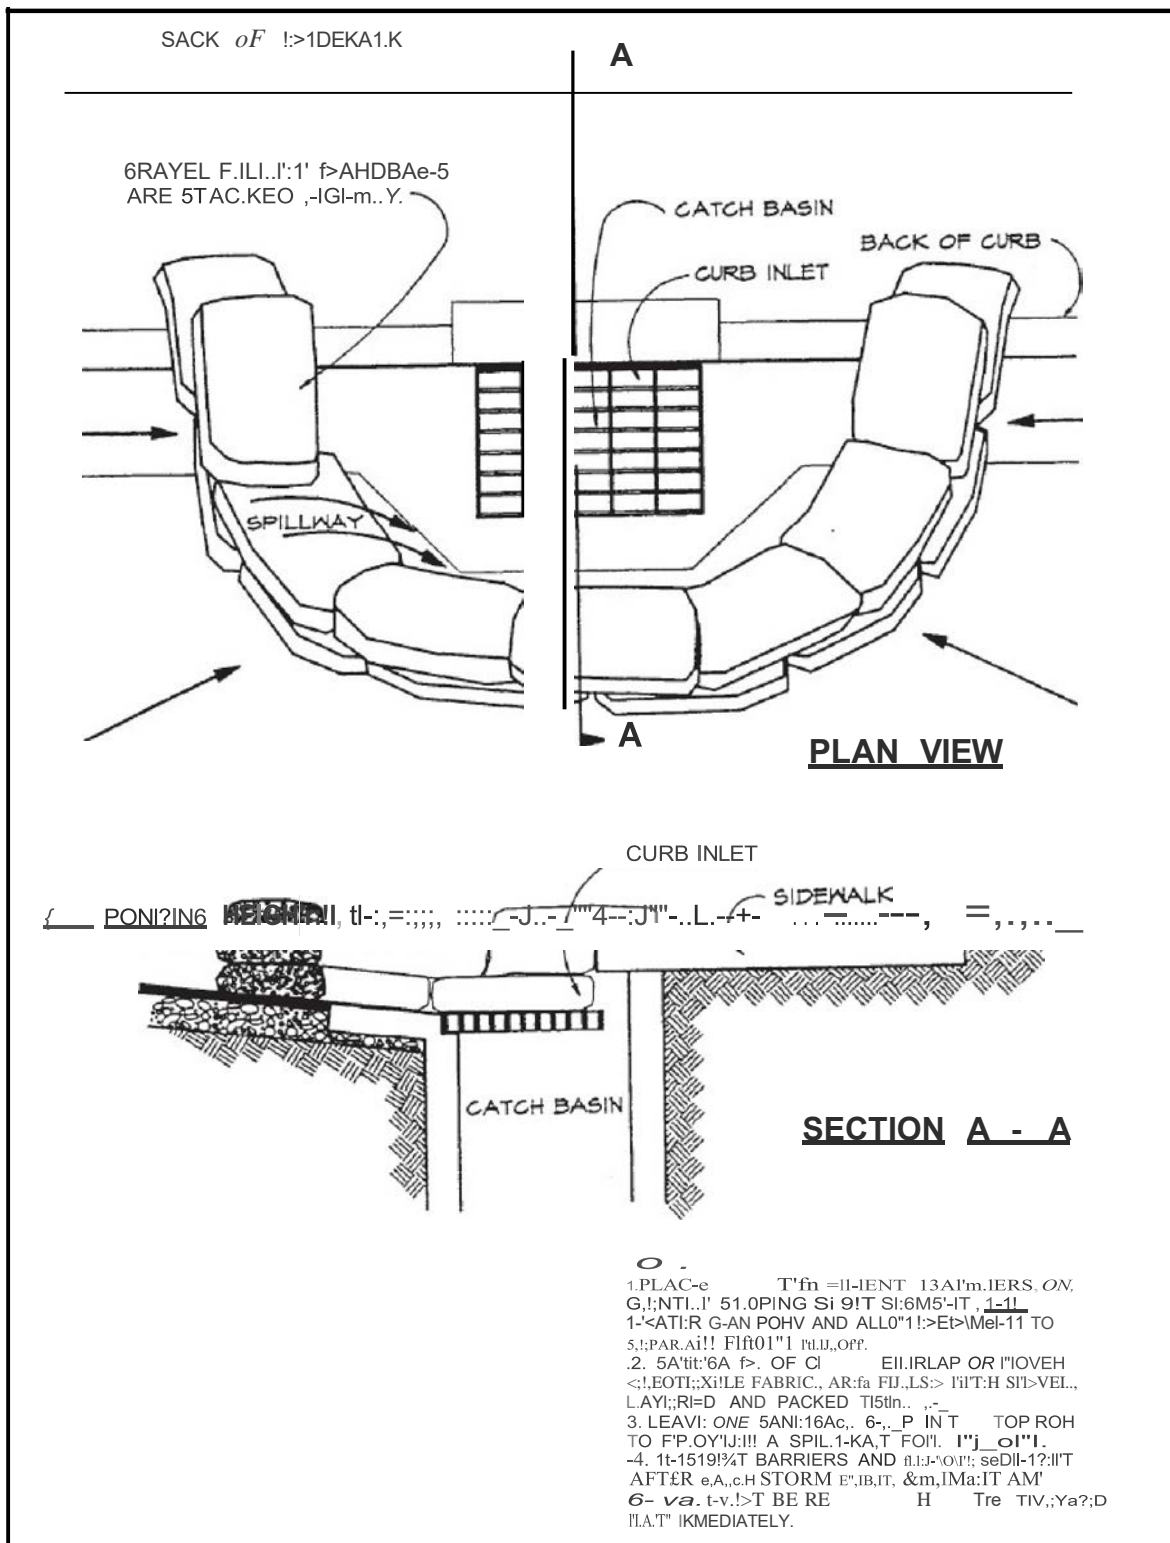

Figure 4.5k. Curb Inlet Sediment Barrier

Source: Erosion Draw

Attachment C: Stacked Turbidity Barrier (Silt Fence)

Silt Fence

Definition:

A temporary sediment barrier consisting of a filter fabric stretched across and attached to supporting posts and entrenched. Some silt fence is wire reinforced for support.

Purpose:

The purpose of a silt fence is to slow the velocity of water and retain sediment on site.

Planning Considerations:

Silt fences can trap a much higher percentage of suspended sediments than straw bales and are preferable to straw barriers in many cases. The most effective application is to install two parallel silt fences spaced a minimum of three feet apart. The installation and maintenance methods outlined here can improve performance.

Design Criteria:

1. No formal design is required for many small projects and minor incidental applications.
2. Silt fences shall have an expected usable life of six months. They are applicable around perimeters and stock piles, and at temporary locations where continuous construction changes the earth contour and runoff characteristics.
3. Silt fences have limited applicability to situations in which only sheet or overland flows are expected. They normally cannot filter the volumes of water generated by channel flows, and many fabrics do not have sufficient structural strength to support the weight of water ponded behind the fence line.

Construction Specifications:

Materials

1. Synthetic filter fabric shall be pervious sheet of propylene, nylon, polyester, or polyethylene yarn. It shall contain ultraviolet ray inhibitors and stabilizers to provide a minimum of 6 months of expected usable construction life at a temperature range of 0°F to 120°F (-17°C to 49°C).
2. The stakes for a silt fence shall be 1 x 2 inches (2.5 x 5 cm) wood (preferred), or equivalent metal with a minimum length of 3 feet (90 cm).
3. Wire fence reinforcement for silt fences using standard-strength filter cloth shall be a minimum of 36 inches (90 cm) in height, shall be a minimum 14 gauge, and shall have a maximum mesh spacing of 6 inches (15 cm).

Sheetflow Application: Silt Fence

1. The height of a silt fence shall not exceed 36 inches (90 cm). Higher fences may impound volumes of water sufficient to cause failure of the structure.
2. The filter fabric shall be purchased in a continuous roll cut to the length of the barrier to avoid the use of joints. When joints are necessary, filter cloth shall be spliced as described in Item 8 below.
3. Posts shall be spaced a maximum of 10 feet (3 m) apart at the barrier location and driven securely into the ground a minimum of 12 inches (30 cm). When extra-strength fabric is used without the wire support fence, post spacing shall not exceed 6 feet (1.8 m).
4. A trench shall be excavated approximately **4 inches (10 cm) wide and 4 inches (10 cm) deep** along the line of posts and upslope from the barrier.
5. When standard-strength filter fabric is used, a wire mesh support fence shall be fastened securely to the upslope side of the posts using heavy duty wire staples at least 1 inch (25 mm) long, tie wires, or hog rings. The wire shall extend into the trench a minimum of 2 inches (5 cm) and shall not extend more than 36 inches (90 cm) above the original ground surface.

6. The standard-strength filter fabric shall be stapled or wired to the fence and 8 inches (20 cm) of the fabric shall be extended into the trench. The fabric shall not extend more than 36 inches (90 cm) above the original ground surface.
7. When extra-strength filter fabric and closer post spacing are used, the wire mesh support fence may be eliminated. In this case, the filter fabric is stapled or wired directly to the posts with all other provisions of Item 6 applying.
8. When attaching 2 silt fences together, place the end post of the second fence inside the end post of the first fence. Rotate both posts at least 180 degrees in a clockwise direction to create a tight seal with the filter fabric. Drive both posts into the ground and bury the flap (See Figure 14 – Silt Fence Installation)
9. The trench shall be backfilled and the soil compacted over the filter fabric.
10. The most effective application consists of a double row of silt fences spaced a minimum of 3 feet apart, so that if the first row collapses it will not fall on the second row. Wire or synthetic mesh may be used to reinforce the first row (See Figure 15 – Double Row Stacked Silt Fence).
11. When used to control sediment from a steep slope, silt fences should be placed away from the toe of the slope for increased holding capacity (See Figure 16 – Proper Placement of Silt Fence at Toe of Slope).
12. Silt fences shall be removed when they have served their useful purpose, but not before the upslope area has been permanently stabilized.

Maintenance:

1. Silt fences shall be inspected within 24 hours after each ½ inch rainfall event and at least once a week. Any required repairs shall be made immediately.
2. Should the fabric on a silt fence decompose or become ineffective before the end of the expected usable life and the barrier is still necessary, the fabric shall be replaced promptly.
3. Sediment deposits should be removed when deposits reach approximately one-half the height of the barrier.
4. Any sediment deposits remaining in place after the silt fence is no longer required shall be dressed to conform to the existing grade, prepared, and seeded.

TOWN OF GOLDEN BEACH
ACKNOWLEDGEMENT and AFFIDAVIT BY OWNER
Chapter 46-85 Height of Seawalls and Docks and Extension of Deck of Dock.
of the Code of Ordinances
Article IV Seawalls and Docks.

Affidavit by Owner: _____

Folio No.: _____ Address: _____

Legal Description: _____

Being duly sworn, deposes and says: That He/She is the Owner named in the permit application for construction or other related work to be performed on, or in connection with, the premises, as indicated above, and is in agreement that granting of a permit for construction on said premises, agrees to repair, or replace said seawall in question;

- a) All new and replacement seawalls shall be constructed at an elevation of 4.425 feet above the North American Vertical Datum of 1988 (NAVD-88). Except as provided in section (b) below, all new and replacement docks shall be constructed at a minimum height of 3.425 NAVD-88, and a maximum not to exceed 4.425 NAVD-88. No finished material installed or applied to the seawalls or docks shall exceed three inches in thickness. No cover shall be permitted to be erected in connection with any dock.

- b) Where any legal non-conforming seawall exists, a new or replacement dock may be constructed at an elevation which is not more than one foot below the top of the cap of the existing seawall.

TOWN OF GOLDEN BEACH
ACKNOWLEDGEMENT BY CONTRACTOR:
CONSTRUCTION SITE
RETENTION WALL REQUIREMENTS
FOR NEW CONSTRUCTION

Effective November 18, 2015, anyone applying for a new construction building permit must install and complete a retaining wall along the back and sides of the property upon or before installing the building foundation. Structural retaining walls will require a minimum 4 foot stem wall.

When structural retention walls are used the retention walls must be erected to a minimum height of 4 feet in sections as the temporary construction fence is partly removed to allow for installation. Once stem walls have been installed, the temporary fence must be re-installed, the only exception being if a permanent masonry wall has been erected closing off the property. Property must be secured prior to the inspection of the first floor slab. (Town Code Section 66-6 (i))

**NOTICE TO CONTRACTORS: MANDATORY REQUIREMENTS FOR
CONSTRUCTION SITE CLEANLINESS AND CONSTRUCTION SITE SAFETY**

Company Name: _____

Town Registration number (CR #): _____

Qualifier Name: _____

Contact Phone: _____

Email Address: _____

1. Construction work start time in Town is 8:00 am. No work is to start or the gates to be open prior to 8:00 am. All construction work at sites are to stop by 6:00 pm, Monday through Friday. No construction work is allowed on weekends and legal holidays that are set by the Town.
2. All construction sites must be secured with a perimeter chain link fence containing a black or green wind screen (all wind screen material must be tight and secured daily-no torn or sagging wind screen will be tolerated), construction entry gates must be locked and the dumpster must be covered by close of business each day. **Daily maintenance is required.**
3. No heavy equipment or trailers are permitted to be stored, overnight or on the weekends, at the construction site without first obtaining a special exception permit, which requires the payment of fee, from the Town.
4. **Blocking of the Town's roadways will not be tolerated. Parking along the curbs of the Town's roadways is not allowed. Each contractor must monitor and supply ample parking for their employees and visitors travelling to the site. Scheduling of concrete pours and all phases of construction that may require trucks and or heavy equipment vehicles to be stationed on the Town's road ways must supply a certified flagman to direct traffic or make arrangements for an office duty officer from the Town, in addition sites on Ocean Boulevard will require a Florida Department of Transportation lane closure permit.**
5. During the course of construction or demolition work being done on any premises, it shall not be permitted for any person to cause, permit or allow the emissions of particulate matter from any source whatsoever, including, but not limited to, incidents caused by vehicular movement, transportation of materials, construction, alteration, demolition or wrecking of buildings or structures, or the stockpiling of sand or dirt, without taking reasonable precautions to prevent such emissions or to preclude fugitive particulates that may trespass on neighboring properties during dry and windy weather. In the case of stockpiled particulate materials, such materials shall be stabilized by adequate coverings, by wetting to the satisfaction of the Town's Officials.

6. Construction sites and neighboring properties are to be maintained in a clean condition at all times and any papers, litter, dirt, dust and/or construction materials are to be disposed of and/or secured at the end of each day's work by placement in the trash container provided at the construction site. All trash containers must be covered nightly and on weekends as required by our code. Daily maintenance is required.
7. Gravel entry areas into the construction site are to be maintained as to eliminate standing water and runoff into the roadway. All water discharge must adhere to NPDES standards.
8. High grass and weeds are to be cut and maintained as to not create a public nuisance. Daily maintenance is required.
9. All areas surrounding construction sites, especially the Town's roadways, which are affected by dust, dirt and debris from the construction site. Each site shall be swept clean of such dust, dirt and debris a minimum of two times per day; at least one of which must be at the conclusion of work for that day. Daily maintenance is required.
10. All construction debris not placed in a dumpster shall be removed from the construction site within twenty-four (24) hours.
11. Pools under construction shall be kept clean of any debris and water buildup until such time as the pool is properly filtered. All standing water in pools under construction or not in use must be properly treated to eliminate algae, insects, etc.
12. It is not be permitted for any person to store any material in an unsecured area, which is deemed unsafe, or a danger to those accessing the site. It is not be permitted to store any construction materials in any manner whereby the material or a portion of the materials is stored outside the legal boundaries of the site. Reasonable exceptions to this subsection, for a reasonable period of time, may be considered on a case-by-case basis by obtaining permission by the Town Manager.
13. All exposed rebar shall be capped as required by OSHA. For Any exposed uncapped rebar a violation of life safety will be issued to the property.
14. **Sidewalk, Curb and Gutter Repair/ Replacement- all zones:** The qualifier or applicant are in agreement that any damages caused to the Town's infrastructure by the contractor or the owner's employees or agents, shall be repaired and/or replaced at the expense of the contractor and/or owner as directed by the Town of Golden Beach.
15. **Survey Discrepancies- only applicable to the 600 block on Golden Beach Drive:** We have received inaccurate surveys generating from properties located at the north end of Golden Beach Drive in the area of the 600 Block; an incorrect monument marker had been used for construction of certain properties that caused property line discrepancies. The Town of Golden Beach is advising to use the correct monument marker south of the corner property location 600 Golden Beach Drive; Miami-Dade County Benchmark #E-203 .
16. **Construction Site Retention Wall Requirement for major re-construction and New Construction- all zones:** Effective November 18, 2015, anyone applying for a new construction building permit must install and complete a retaining wall along the back and sides of the property upon or before installing the building foundation. Structural retaining walls will require a minimum 4 foot stem wall. When structural retention walls are used the retention walls must be erected to a minimum height of 4 feet in sections as the temporary construction fence is partly removed to allow for installation. Once stem walls have been installed, the temporary fence must be re-installed, the only exception being if a permanent

masonry wall has been erected closing off the property. Property must be secured prior to the inspection of the first floor slab. (Town Code Section 66-6 (i))

17. **Notice of Commencement-** Florida's Construction Lien Law (Chapter 713, Part One, Florida Statutes) requires the recording with the Clerk of the Courts a Notice of Commencement for real property improvements greater than \$2,500.00. However, it does not apply to the repair or replacement of an existing heating or air conditioning system less than \$7,500.00 in value. Please find attached form if applicable.

After the building permit is issued, that a certified copy of the recorded Notice of Commencement, with attached bonds if any, is posted at the construction site. You are required to schedule with the town within 7 days after the issuance of your permit, if applicable; the first inspection to verify (NOC inspection). Failure to show the inspector a certified copy of the recorded Notice will result in a disapproved inspection. You are also required to provide the town with a copy. It can be emailed (please reference the permit number) to inspections@goldenbeach.us or it can be handed to the inspector at the time of the inspection.

18. **A Violation of these Mandatory Requirements shall constitute grounds for the issuance of a stop work order** by the Town Manager, the Town Manager's designee, and/or the building official in accordance with the provisions of the Town's Code of Ordinances and the Florida Building Code. **A civil violation fine will be imposed upon the property** for each infraction committed in accordance with the Town's Code of Ordinances.

PERMIT EXPIRATION AND THE LAW

105.4.1 Permit intent. A permit issued shall be

construed to be a license to proceed with the work and not as authority to violate, cancel, alter or set aside any of the provisions of the technical codes, nor shall issuance of a permit prevent the building official from thereafter requiring a correction of errors in plans, construction or violations of this code. Every permit issued shall become invalid unless the work authorized by such permit is commenced within six months after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of six months after the time the work is commenced.

105.4.1.1 If work has commenced and the permit is revoked, becomes null and void, or expires because of lack of progress or abandonment, a new permit covering the proposed construction shall be obtained before proceeding with the work.

105.4.1.2 If a new permit is not obtained within 180 days from the date the initial permit became null and void, the building official is authorized to require that any work which has been commenced or completed be removed from the building site. Alternately, a new permit may be issued or the original permit reinstated on application, providing the work in place and the work required to complete the structure meets all applicable regulations in effect at the time the application was submitted for the initial permit and any regulations which may have become effective between the date of expiration and the date of issuance of the new permit or the date of the reinstatement of the original permit. Applicable regulations which may have become effective between the date of the original permit application and the date of issuance of the new permit or reinstated permit may be modified if their application clearly would be impractical in the judgment of the building official, but only where it is clearly evident a reasonable degree of safety is maintained.

105.4.1.3 **Work shall be considered to be in active progress when the permit has received an approved inspection within 180 days.** This provision shall not be applicable in case of civil commotion or strike or when the building work is halted due directly to judicial injunction, order or similar process.

105.4.1.4 The fee for renewal reissuance and extension of a permit shall be set forth by the administrative authority.

Sec. 14-84. Construction sounds.

The construction (including excavating), demolition, alteration, or renovation of any structure, gazebo, dock, home or building on Saturday, Sunday and any time other than between the hours of 8:00 a.m. and 6:00 p.m. on any weekday is prohibited. Such activity is also prohibited on New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, or Christmas Day. In case of urgent necessity in the interest of public health and safety, a permit to allow activity prohibited by this section may be granted by the Town Manager or his designee for a period not to exceed three consecutive working days or less while the emergency continues. Such permit shall contain conditions relating to the work and providing safeguards to the surrounding residences and their occupants and may be renewed for successive periods of three days or less while the emergency continues and if a substantial hardship exists. Violation of the conditions combined within the permit shall result in immediate revocation of the permit and shall automatically authorize the Town authorities to cause the work to cease. In addition to cessation of the work, violation of the permit conditions subject the property owner to a fine. If the Town Manager or his designee should determine that the public health and safety necessitates the issuance of such a permit and such issuance will not unduly impair the public health and safety a permit may be issued by the Town Manager or his designee to allow the erection, demolition, alteration or repair of any structure, gazebo, dock, home or building or excavation of streets and highways within the hours of 6:00 p.m. and 8:00 a.m. of the following day or on Saturday, Sunday, New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day or Christmas Day for such work to be done within such hours or within a shorter time period during such hours, upon application being made at the time the permit for the work is issued or during the progress of the work.

(Code 1989, § 14.08; Ord. No. 406.95, § 1, 6-20-95; Ord. No. 475.2003, § 1, 11-19-02)

My Commission Expires: _____

MIAMI-DADE COUNTY CONSTRUCTION LIEN LAW FOR OWNERS

NOTE: IF YOU SIGNED AS THE OWNER'S AGENT YOU ARE RESPONSIBLE FOR DELIVERING THIS INFORMATION SHEET TO THE OWNER OF THE PROPERTY.

WARNING TO OWNER

Florida's Construction Lien Law (Chapter 713, Part One, Florida Statutes) requires the recording with the Clerk of the Courts a Notice of Commencement for real property improvements greater than \$2,500.00. However, it does not apply to the repair or replacement of an existing heating or air conditioning system less than \$5000.00 in value. This notice must be signed by you, the property owner.

Under Florida law, those who work on your property or provide materials and are not paid, have a right to enforce their claim for payment against your property. This claim is known as a construction lien.

YOU MUST FILE A NOTICE OF COMMENCEMENT

For your protection under the Construction Lien Law and to avoid the possibility of paying twice for improvements to real property, you must record a Notice of Commencement in the Clerk of the Court's Office. You also must provide a certified copy of the recorded document at the construction site. The Notice of Commencement must be signed by you, the owner contracting the improvements, and not by your agent.

The Notice of Commencement form, provided with this information packet, must be completed and recorded within 90 days before starting the work.

A copy of the payment bond, if any is required by you and purchased by the contractor, must be attached as part of the Notice of Commencement when recorded.

If improvements described in the Notice of Commencement are not actually started within 90 days after the recording of the Notice, a new Notice of Commencement must be recorded.

You lose your protection under the Construction Lien Law if the payments are made to the contractor after the expiration of the Notice of Commencement. The Notice is good for one year after the recording date or up to the date specified under item nine of the form.

Florida law requires the Building and Neighborhood Compliance Department to be a second source of information concerning the improvements made on real property. The Building Permit Application (included with this packet) has been expanded to include information on the construction lender and the contractor's surety, if any. The new application requires your signature or your agent's, to inform you of the Construction Lien Law.

YOU MUST POST THE NOTICE OF COMMENCEMENT AT THE JOB SITE

By law, the Building and Neighborhood Compliance Department is required to verify at the first inspection, after the building permit is issued, that a certified copy of the recorded Notice of Commencement, with attached bonds if any, is posted at the construction site. Failure to show the inspector a certified copy of the recorded Notice will result in a disapproved inspection, (Florida Statute 713.135(1)(d)).

NOTICE TO OWNER FROM SUBCONTRACTORS AND SUPPLIERS

You may receive a Notice to Owner from subcontractors and material suppliers. This notice advises you that the sender is providing services or materials. Subcontractors and suppliers must serve a Notice to Owner within 45 days of commencing work to preserve their ability to lien your property.

If your address changes from that given in the Notice of Commencement, you should record a corrected Notice reflecting your current address. This is done to help ensure you will receive all notices.

RELEASE FROM LIEN FROM CONTRACTOR

Prior to paying the contractor, you need to receive a Release of Lien and Affidavit to the extent of payment from the general contractor. The Release of Lien and Affidavit shall state either that all the subcontractors and suppliers have been paid or list those unpaid and the amount owed. The contractor is required to list on the Release of Lien and Affidavit any subcontractor or supplier that has not been paid. That amount may be withheld from the contractor's pay and paid directly to the subcontractor or suppliers after 10 days written notice to the contractor.

If the balance due to the contractor is not sufficient to pay in full all subcontractors and suppliers listed on the contractor's affidavit, you may wish to consult an attorney.

The general contractor shall furnish a final Release of Lien and Affidavit to the owner indicating all subcontractors and suppliers have been paid at the time he requests final payment. You can rely on the affidavit in making final payment to the general contractor. If you make final payment to the general contractor without obtaining the affidavit, your property can be liened for non-payment if the general contractor fails to pay the subcontractors or suppliers. You should always obtain a Release of Lien and Affidavit from the contractor to the extent of any payments being made.

RELY ON YOUR LENDER FOR COMPLIANCE WITH CONSTRUCTION LIEN LAW

If you have a lender, you may rely on the lender to handle the recording of the Notice of Commencement. Learn more about the Construction Lien Law by contacting an attorney, your lender, or the Florida Department of Agricultural and Consumer Services, Division of Consumer Services.

Documents are recorded at the Clerk of the Courts, MIAMI-DADE COUNTY RECORDER, COURTHOUSE EAST, 22 N.W. First Street, 1st Floor, Miami, FL 33128.

You can record the Notice of Commencement by mail. The original Notice should be sent to the County Recorder, P.O. Box 011711, Flagler Station, Miami, Florida 33101. Please make sure the original Notice is signed and notarized. Also, remember to enclose the recording fee (for a single copy) and written instructions for recording and returning a certified copy of the recorded documents. For additional information on fees and recording documents call (305) 275-1155.

Application is hereby made to obtain a permit to do the work and/or installations as indicated. I certify that no work or installation has commenced prior to the issuance of a permit and that all work will be performed to meet the standards of all laws regulating construction in this jurisdiction. I understand that a separate permit must be secured for Electrical, Plumbing, Mechanical, Windows, Doors, Roofing, Site Walls, Fencing, Driveways, Pools, Spas, Pool Decks, Outdoor Kitchens, Accessory Structures, Irrigation, Landscape and Landscape Lighting work and other categories not mentioned.

Owner's Affidavit: I certify that all the foregoing information is accurate and that work will be done in compliance with all applicable laws regulating construction and zoning.

NOTICE REGARDING BUILDING PERMIT APPLICATIONS

The Completion and submission of a Building Permit Application is a requirement of securing a Building Permit. The Town will rely upon the information contained in the Application in determining whether a Building Permit should be issued. The submission of inaccurate, misleading or misrepresented information in the Application shall subject the Building Permit to denial, suspension or revocation, and the individual applying for the permit, to all appropriate fines, penalties and other punishments authorized by law. KINDLY GOVERN YOURSELF ACCORDINGLY.

WARNING TO OWNER: YOUR FAILURE TO RECORD A NOTICE OF COMMENCEMENT MAY RESULT IN YOU PAYING TWICE FOR IMPROVMENTS TO YOUR PROPERTY. IF YOU INTEND TO OBTAIN FINANCING, CONSULT WITH YOUR LENDER OR AN ATTORNEY BEFORE RECORDING YOUR NOTICE OF COMMENCEMENT.

NON-CONVERSION AGREEMENT FOR ENCLOSURES BELOW THE BASE FLOOD ELEVATION OR DESIGN FLOOD ELEVATION

This DECLARATION made this ___ day of ___, _____, by _____ ("Owner") having an address at _____ in the Town of Golden Beach, Florida designated in the Tax Records as Folio # _____ as recorded in the public records of Miami Dade County in Book No. _____, Page No. _____.

WITNESSETH:

WHEREAS, the Owner has applied for a permit to construct, improve, or repair the property owned by _____ (name) at _____ (address) in the Town of Golden Beach and:

- 1) It is identified by building Permit No. _____, dated _____;
- 2) It is located on a flood hazard area identified on Flood Insurance Rate Map Panel # _____, dated _____;
- 3) It is located in flood zone(s):

_____ Base Flood Elevation _____
_____ Base Flood Elevation _____
_____ Base Flood Elevation _____

Seaward of LiMWA or community defined Coastal A Zone limit: ☐ Yes ☐ No

Seaward of Coastal Construction Control Line: ☐ Yes ☐ No

Florida Department of Environmental Protection 100-Year Storm Elevation _____ (NGVD).

- 4) It is designed to conform to the requirements of the Town of Golden Beach Floodplain Management Ordinance referred herein as "Land Development Regulations," of Golden Beach and the most current edition of the Florida Building Code - Residential; and
- 5) If unauthorized improvements, modifications, alterations, conversions or repairs are made to it in the future, the structure could be made noncompliant by such unauthorized actions, including such actions by future owners.

WHEREAS, the Owner agrees to record this DECLARATION OF LAND RESTRICTION (NON-CONVERSION AGREEMENT) in the public records of Miami Dade County and certifies, accepts and declares that the following covenants, conditions and restrictions are placed on the affected property as a condition of granting the Permit, and affects rights and obligations of the Owner and any future owners, and shall be binding on the Owner, his heirs, personal representatives, successors and assigns.

THE PERMITTED STRUCTURE SHALL BE DESIGNED AND CONSTRUCTED IN ACCORDANCE WITH THE FLORIDA BUILDING CODE – RESIDENTIAL AND/OR LOCAL FLOODPLAIN MANAGEMENT REGULATIONS, AS APPLICABLE AND SUBJECT TO THE CONDITIONS, as follows:

1. The structure or part thereof to which these conditions apply is:
☐ An enclosure that is below the Base Flood Elevation or Design Flood Elevation.

- ☐ A detached, allowable accessory structure that is not elevated.
2. Enclosed areas below the Base Flood Elevation or Design Flood Elevation, whichever is higher, shall be used solely for parking of vehicles, limited storage, or access to the building. All interior walls, ceilings and floors within the enclosed area shall be unfinished or constructed of flood damage-resistant materials and shall not be used for recreational or habitable purposes. Installation of minimal electrical, mechanical and plumbing equipment, devices and fixtures as allowed by the Florida Building Code.
 3. The walls of the enclosed areas below the Base Flood Elevation or Design Flood Elevation of the structure or part thereof identified in #1 shall be designed to breakaway. The breakaway walls shall not be altered in any way that prevents the walls from breaking away, as designed, under flood conditions.
 4. The breakaway walls of the enclosed areas below the Base Flood Elevation or Design Flood Elevation of the structure or part thereof identified in #1 shall be equipped with flood openings. The flood openings shall not be blocked, covered, manually closed or modified in any way that would alter the intended performance to allow floodwaters to automatically enter and exit.
 5. Any conversion, alteration, modification, improvement, repair or changes from these conditions constitute a violation of the Permit and this agreement, and may render the structure non-compliant with minimum requirements, and result in higher NFIP flood insurance rates. The Town of Golden Beach, as the jurisdiction issuing the Permit and enforcing this agreement, may take any appropriate legal action to correct any violation.
 6. A duly appointed representative of the City is authorized to enter the property for the purpose of inspecting the exterior and interior of the enclosed area to verify compliance with this Declaration. Such inspections will be conducted upon due notice to the Owner and no more frequently than once year. More frequent inspections may be conducted if the annual inspection discovers a violation of the Permit
 7. Other conditions: _____
